I heard something about that on one of the other echos. No other info, except that MUFON has a couple of guys working on it.

Subject: Delphos Samples
Date: 21 Jan 92 12:32:19 GMT

From: sgamble@mrc-crc.ac.uk (Steve Gamble x3293)

In a recent posting Jim Speiser states :' I hope Mark (Rodeghier) picks up the Delphos comments and passes to Erol Faruk for comment'.

Erol is a member of BUFORA and one of my Trace analysis team, so I can pick up the comments and pass on.

Steve Gamble

From: mrc-crc.ac.uk!sgamble
Subject: Siberian Encounter
Date: 21 Jan 92 12:32:30 GMT

From: sgamble@mrc-crc.ac.uk (Steve Gamble x3293)

In recent posting, Sheldon Wernikoff raises the point of a Mig-29 pilot not being sure if he saw something on the 24th or 25th of December 1989 as these are Christmas Eve and Christmas Day.

Could I suggest two possible reasons for this :

1. Although the 'Authorities' are happy for people in general to know about the report, they do not want to be too specific about any military operation.

2. I believe that the Russians do not celebrate Christmas as we do in the West. I think that even the Russian Church celebrates a festival on what I would call 12th Night i.e. 6 days after New Year. The 24/25th December would probably just be any other day to the pilot.

Steve Gamble

From: mrc-crc.ac.uk!sgamble
Subject: UK Bulletin Boards
Date: 21 Jan 92 12:32:42 GMT

From: sgamble@mrc-crc.ac.uk (Steve Gamble x3293)

Several people have posted recently asking about UK based UFO Boards. BUFORA has been considering running a board for some while but is not yet in a position to do so.

I have been negotiating recently with a colleague who runs a board for her family history data to have a UFO section. At the moment she has been taking info from wildnet, but if we start a UFO section we would look to take Fidonet as well. I will post as soon (?if) I have any more news.

From: Robert Trevelyan <rob@aixssc.ibm.co.uk>

Keith,
        Thanks for the Australian crop circle posts, very interesting.
        Also looks like D+D did not make Australia then. Here in the UK
        the media seemed to have accepted that D+D were the cause and even
        the local television station, TVS, reported in their 1991 review
        program that 1991 was the year that the corn circle mysteries were
        solved by the emergence of two retired gents. Lets wait and see in
        the 1992 'season'

Regards, Robert

 I would agree with Bill on his points. I also have found that
 Meaden's theory doesn't seem to hold for the flat topography in
 the case of the Manitoba circles. Admittedly, the Alberta circles
 were in slightly rolling terrain, but far different from the
 Britsih experience. Can you cross-post my reply to Chalker?

Actually, the Russians who celebrate Xmas probably celebrate the
Russian Orthodox date -- Jan 6.

Just a footnote...

--Brent

P.S. Re: Crop Circle Radioactivity -- I got a message on another
Net from Marshall Dudley explaining that they've pulled their
upcoming article in the Cerealogist. The lab that did the tests
actually -- when he was able to look at their raw data, instead of
the computer analysis they provided -- seems to have muddled it.
The anomalies may be background noise...

I hope to re-post his (more detailed) message here, if he'll let me.
Or maybe get him calling ParaNet (what's the closest node to
Tennesse?).

 nc> paranormal research and investigations but I recall seeing a
 nc> statement this week (in Nature?) that the claim of planets orbiting
 nc> a pulsar had been retracted by the investigator. Apparently, a
 nc> component of the earth's orbital motion had been neglected in the
 nc> data processing and this accounted for the observed motion of
 nc> the pulsar. The effect is a subtle one and was overlooked because
 nc> it is usually unimportant in this kind of study.
 nc>   On the other hand, a more plausible mechanism for planets
 nc> surviving a supernova explosion of their star was discussed. The
 nc> metallic core of a Jupiter-sized planet might survive and the energy
 nc> released by decompressing the core when the atmosphere ablated
 nc> might help circularize the orbit afterwards.

I understood the retraction to be about a claim made by British
astronomers last June or so... I don't recall if it involved a
pulsar or not. The planetary claim made recently by a different
group of astronomers (involving a pulsar) still stands (I think).

But I think the press has muddled the two in the public's mind -- a
"discovery" followed by a similar-but-unrelated "retraction". Kinda
messy...

And I've heard it hypothesized that the pulsar's planets are
actually material thrown off by the star's collapse and captured in
orbit. Created with the pulsar, rather than pre-existing planets
that survived the cataclysm.

 nc> Subject: Anomalies in the Andes

Hi Greg & sorry for the lapse in replying. I'ze been bizzy theze dayz.

 nc> ? Hmmm, indeed. Actually, some of the
 nc> most interesting stuff is underwater on
 nc> ? the U.S. Costal Shelf, around Bermuda
 nc> and the Caribbean islands, and in the
 nc> ? Gulf of Mexico. I seem to recall the
 nc> discovery of a well-preserved stone
 nc> ? staircase leading down to a beach on the Yucatan.
 nc> ?
 nc> ? But the beach is now 150' underwater, the stairs begin almost
 nc> 100' underwater,

Dr. J. Mason Valentine has explored this. It's been in a couple of books, including Berlitz's Mystery of Atlantis and some more scholarly places I can't recall. The depth was due to both rising sea level & costal subsidence, though, if memory serves.

 nc> ? There's a similar anomaly just below Mancu Picu in the Andes:
 nc> a stairway leads
 nc> ? down to the beach. The beach is at
 nc> about 11,000 feet elevation, and seems to
 nc> ? have been there before the Mountains rose to their present
 nc> height! In fact the
 nc> ? whole city of Mancu Picu has been
 nc> 'undatable' according to some sources,
 nc> ? because it was virtually
 nc> earthquake-proof (until the Conquistadores removed
 nc> ? the flexible silver braces from the buildings).
 nc> ?

Well, I'm still looking for the source of this. I suspect I may have got it wrong -- it's not Mancu Picu but Tihuanaco. I shall continue to persevere to quest after the source. :-)

Best,
  Clark

 >> Heard anything?

 KM> Thanks so much, that was exactly the distant bell that rang in my head
 KM> when I heard the rumor. FEMA, FEMA, FEMA. Bingo!

Kay (& Don),

You may be interested to know that the shadowy bureaucrats of FEMA have

suddenly taken a higher profile here in the Northeast. All of a sudden, two of them appeared on the Jersey Shore, making promises about Federal preparedness to restore the damaged beaches & breakwaters here. This happened three weeks ago, and they haven't been heard from since.

They only seem to be interested in beach areas around Ft. Dix and McGuire AFB, which are slated for reductions and cutbacks. Several folks here have taken notice of this. Theories range from an election-year Federal makework program to help local economies around the bases to conversion of areas within the bases to barracks-type camps.

NSD-47 and the other Executive Orders and Directives of its ilk do not bode well for the continuation of freedom in this country, in my opinion.

Keep you posted as long as the phones work...

Best,
  Clark

DE> HAD STOLEN PROMIS, TURNED IT OVER TO EARL BRIAN. INSLAW ALLEGES

Actually this isn't quite true. Bill Hamilton went "public" to the press much earlier, and Dow Jones/Barron's has followed this case since 1987, not long after Meese attempted to force Inslaw into involuntary bankruptcy in the federal bankruptcy courts. The Napa Sentinel series I posted actually started as a series on corruption in the Federal Bankruptcy courts in Northern California -- that's where Meese's associates have the best connections.

This would have precluded a suit by Inslaw for software piracy by the Attorney General of the United States, the Wackenhut Corporation, and numerous agencies that "recommended" or distributed the stolen software the foreign intelligence /secret police agencies. The involuntary bankruptcy filing was started at the same time Meese was "investigating" Ollie North).

DE> SOFTWARE GIVEN BRIAN AS PAYBACK FOR BRIAN'S HELP IN ARRANGING
DE> ARMS-FOR- HOSTAGE DEAL WITH IRAN IN 1980 (OCTOBER SURPRISE). PER

Problem was, the software was a "gift" like the Trojan Horse (pardon the pun) -- it came with a surprise inside.

The surprise was Ari Ben-Menasche, a sociopathic sometime fixer/functionary for Mossad and Shin-Beth, the Israeli secret service/secret police. Ben-Menasche made the U.S. arms-hostages deals happen, somehow insinuated himself in the Contra/Drug side of the equation, and became involved in the Inslaw matter as a fixer for Brian, when ol' Earl was pitching the Wackenhut-pirated software to Mossad.

Many people say Ben-Menasche is a compulsive liar, and they're right. But have you read his affadivits, Don?

DE> GENERAL THORNBURG, UNDER SUPOENA, RELEASED INSLAW-RELATED FILES -
DE> BUT 15 TO 20 FILES MISSING. ITT 9/10/91 4-5

... and I, for one, am glad Thornburg lost in Pennsylvania. :-) He owed the American people a fair investigation and bugged out. He deserves defeat and disgrace, just as much as Meese, who he's protecting.

 DE> INSLAW PRES BILL HAMILTON SAYS HE HAS INFO THAT PROMIS ILLEGALLY

Subject: Aussie crop circle
Date: 18 Jan 92 20:54:00 GMT

The phenomenon taps in to Paranet. I'm sure of it now. After recently posting an item that we have not had any recent examples of crop circles in Australia I now humbly have to report:-

"The Age" Newspaper, Melbourne, Victoria. 31/12/91.

" "If anyone calls me a prankster, I'll punch them in the nose," says Ken price. It must be said at the outset that Mr Price, a Mallee wheatgrower for 50 of his 64 years, is not a violent person. Nor is he a ratbag or a hoaxer. He does, however, have some unexplained circles in his wheat paddocks that are attracting the attention of international crop circle watchers, and yes, UFO enthusiasts.
Mr Price first stumbled upon the circles earlier this month when he and his son Noel were harvesting their wheat. There are six circles varying from two to 3.5 metres in diameter and another larger oval 4.5 metres across in another paddock.
On seeing the first circle, Mr Price put the flattened crop down to foxes and thought nothing more about it. When he came upon another, then another and then a few days later the large oval, 1.5 kilometres away, he called in neigbours to take a closer look. They, like him, had never seen anything like it and were fascinated.
It was then that he contacted another farmer, Mrs Nancy Jolly, who put him in touch with a group led by Colin Andrews, the British crop circle researcher who gave up his job as an electrical engineer 18 months ago to go on the crop circle detective trail full time.
In 1989, a number of crop circles had appeared at Mrs Jolly's Turriff farm, about 20 kilometres from the Price farm near Hopetoun. A third, unconfirmed sighting has also been reported at nearby Beulah.
Mr Andrews visited Australia recently and last month spent some time on the Jolly property.
Mr Price does not believe the circles are the handiwork of a practical joker. "I assure you it's fair dinkum," he says. "No person could re-create them, or flatten a crop like that." He is taking the Great Mallee Mystery in his stride, although he was reported to be slightly alarmed at a suggestion by a UFO "expert" that the field might be radioactive. It isn't."

Hi Mark Rodeghier (No 2)

There is no mix up, my message was directed to Mark Rodeghier of the
Center for UFO Studies because I know him but I don't know you. So
it's basically very simple. You can write to him C/- J.Allen Hynek Center for
UFO Studies, 2457 West Peterson Avenue, Chicago, Illinois 60659.
Info. Paranet is an open area so I am sure Mark Rodeghier was able to
read my message.
Regards,
Vladimir

Hi Steve... I certainly agree with #2. In all likelihood, there would be inadequate probability of association with the 24/25 date, for your stated reasons. However, #1 does not readily apply, since Vladimir was not engaged in a military operation at the time of his sighting. He was rehearsing aerobatics for the Chelyabinsk Aeroclub, a civilian organization. Additionally, the article appeared in IUR under the sponsorship of the Joint American-Soviet Aerial Anomaly Federation (JASAAF), a civilian organization.

I still feel that the actual date of the event should have been known or easily retrievable by one of the principals, or Haines, the author.

There may be a very valid reason for this incongruity, but frankly, I've yet to be convinced.

Thanks for your post,

-- Sheldon

BW> that they've pulled their upcoming article in the Cerealogist.

PLEASE!!! Do post anything further you hear on this one.

A most interesting development. Score 1 more for the skeptics.

Take care,

Sheldon

Clark Matthews asked:

> PS -- Don, could you repost info on getting CIABASE?

Sure Clark. The cost is $99.00 U.S., and send check or money order to

CIABASE
P.O. Box 5022
Herndon, Va. 22070

It comes on floppys, so tell them 5 1/4 HD or DD, or 3 1/2 HD or DD.

Tell em Don sent you..... <g>

Don

I'll have to look for that book, thanks. As for common symbols, how many ways are there to symbolize a tree or a stream, or a cave? There are bound to be duplications. I've been reading about indian petroglyphs lately and found the only book where someone has "broken" the code. Really interesting. So for example make a spiral, now make it the other way, you now have two symbols that are universally found on planet earth. Is there anything strange about that? l = 1 ll = 2 lll = 3 etc.

I'm not trying to discount any transfer of language or blendings, but I would say that sometimes finding things that are similar is a matter of human intellegence. We have the ability to reflect and reason. We can remember and apply from different areas of knowledge. When I see the same symbols in Celtic designs that Indians used in rock drawings, does that imply that the two groups met or had contact? Personally I don't believe so. Coincidence yes, limitations on variations also.

If one looks for strange things, they will without a doubt find something strange.

I read USA today for the sports section, and football is the only one I follow. They have some interesting articles which I will miss until next Sept. The one about West and the Pyramids got clipped and saved. I haven't seen anything on UFO's, but they do get into some unusual events in depth. When the flight 19 flap was going on they had coverage, which most other newspapers gave about two inches.

I warned someone else not to ask me for things or they would get three pounds UPS to dig through. 8*)
